The Investigation of the Bureau Begun.

THE CROP REPORT FOR MARCH.

Explosion - Spinners' Strike - The
Greeks - Telegraph Dividend
- The Railroad Strike.

The Pension Bureau.

WASHINGTON, March 10.-The Senate committee on expenditures of public money began an investigation of the charge brought by Commissioner Black in his report that the office under his predecessor was a political machine, and of the manner in which the Pension Office had been conducted and administered by the present commissioner. General Black was present and requested that he be permitted to give the committee the names of witnesses whom he desired to have examined before he made his own statement. Senator Kenna embodied the request in a motion.

Senator Harrison argued that it was as General Black had made a statement in his annual report upon which the investigation was based, the committee would have to examine the names of the witnesses whom he desired to have examined before he made his own statement. Senator Kenna embodied the request in a motion.

The Crop Report.

WASHINGTON, March 10.-The March report of the Department of Agriculture on the consumption and distribution of grain crops makes the proportion of corn still in the hands of farmers 40 per cent. of the last crop. One year ago the proportion of the crop on hand was 37.6 per cent. The proportion is the lowest in the west, where heavy winter feeding is required, averaging 38 per cent. in twelve States and 45 per cent. in the south. The proportion merchantable is 83.6 per cent, which is slightly above the average of a series of years. The stock of wheat in the hands of farmers is 39.1 per cent. of the crop. It was 33.9 one year ago and 28.4 two years ago. It amounts to 107,000,000 bushels, against 109,000,000 last March, and 119,000,000 two years ago. It is only 9,000,000 more than in March, 1882, the shortest invisible supply in recent years. The visible and invisible supply on March 1 was, therefore, 109,000,000 bushels against 212,000,000 last March. The proportion of the crop estimated for consumption within the country where grown, is 41.8 per cent.

Explosion.

Boston, March 10.-The tug John Mark left her berth at "T" wharf at 6.30 this morning and started down the harbor in search of vessels deserving her services. There was a large number of persons on the wharf who watched the boat steam away. Just as the boat arrived off Long Island, an explosion occurred on board, the cause of which was plainly audible in this city. The boat was completely blown to atoms, and her crew of five men were instantly killed. The bodies of the captain and engineer were recovered by tugs cruising in the vicinity.
